## distillation top with structured packing and SiC condensor

---

### Characteristics:

- NW 200 column distillation head, 3.3 borosilicate glass, for enamelled stirrer tanks
- corrosion-resistant NW 200 structured packing, glass-lined ceramic
- NW 200 reflux separator, 3.3 borosilicate glass / PTFE with pneumatic cycling
- NW 200 liquid distributor, 3.3 borosilicate glass
- SiC condensor, 2.5 m<sup>2</sup>, NW 150 glass jacket with PTFE bottom plates and SiC tubes PTFE transverse baffles, draining construction stainless steel hoods for cooling medium connection
- tubing, control panels and measuring technology
- frame, galvanised steel
- directives
  - pressure equipment directive 97/23 EC
  - ATEX
  - TA-Luft (German technical instructions on air quality control) compliant connections and fittings
